

Ehla2ly

يقلق إح!

Your Barber. Your Time. Your Style.

Ehla2ly is a men's barber booking and relationship app built for the Egyptian market. This document defines the visual identity system including colors, typography, spacing, iconography, and usage rules.

Color palette

Primary, neutral, and semantic color systems

PRIMARY BRAND COLORS

Teal is the brand's core identity. Used for CTAs, active states, and key UI elements.

NEUTRAL PALETTE

White-dominant UI with ink for text, grays for structure. No cream backgrounds in-app.

SEMANTIC / STATUS COLORS

Used for booking states, badges, and system feedback. Each has a bg + text variant.

USAGE RULES

- DO:** Use teal (#0D7377) for primary buttons, active nav items, rating numbers, and price text.
- DO:** Use white (#FFFFFF) as the dominant background. App is white-first, not cream-first.
- DO:** Use Ink (#2C2A25) for all primary body text and headings.
- DON'T:** Use teal as a background for large surfaces. Reserve it for the upcoming card and stat blocks only.
- DON'T:** Use cream (#F5F0E6) as an in-app background. Cream is for marketing materials and print only.
- DON'T:** Mix semantic colors. One status badge per element. No green + gold on the same card.

Typography

Font families, weights, and scale system

PRIMARY TYPEFACE — PLUS JAKARTA SANS

Used for all English UI text. Available on Google Fonts. Geometric, modern, highly legible.

Regular (400)	Used for body text, descriptions, and secondary labels
Medium (500)	Used for form labels, subtle emphasis, tab items
SemiBold (600)	Used for card titles, barber names, section headers
Bold (700)	Used for prices, stats, button labels
ExtraBold (800)	Used for page titles, hero text, the user greeting

ARABIC TYPEFACE — NOTO KUFİ ARABIC

Used for all Arabic UI text. Kufi style pairs well with Jakarta Sans geometric forms.

ي ل ق ل ح إ	Display size — app name, page titles
كُ ق أ ل ح ن ع ث ح ب ا	Section headers
#٢ ديف ديم نقد + صق	Body text, descriptions

TYPE SCALE

Consistent sizing across all screens. Based on 4px increments.

22px	ExtraBold	Page titles, greeting
20px	ExtraBold	Section page titles
16px	Bold	Date headers, back-nav title
14px	Bold	Card titles, barber names
13px	SemiBold	Service names, time slots
12px	Regular	Shop names, descriptions
11px	SemiBold	Badges, filter chips, ratings
10px	SemiBold	Labels, card subtitles, timestamps
9px	Bold	Tab bar labels, bottom nav

TYPOGRAPHY RULES

- All UI text uses Plus Jakarta Sans. No fallback to system fonts in production.
- Arabic text uses Noto Kufi Arabic. Never mix Arabic and Latin in the same text run.
- Minimum font size in the app is 9px (Tab Bar Labels). Never go smaller.
- Teal (#0D7377) for prices, ratings, and active-state text. Ink (#2C2A25) for everything else.
- Letter-spacing: 0 for body, -0.3px to -0.5px for large titles, +1.5px for uppercase labels.

UI Components

Cards, buttons, badges, and spacing rules

CARD SYSTEM

All cards use the bordered style. No shadows. No glassmorphism. Consistent border-radius.

Standard card

border: 1.5px solid #E8E8E8

border-radius: 14px | padding: 14px

Accent card (teal)

background: #0D7377

Used for: upcoming apt, stats, visit count

BUTTONS

One primary button style. Full-width in cards. Teal fill, white text, 12px radius.

Book with Ahmed

background: #0D7377

border-radius: 12px | padding: 15px

font: 14px/700 | color: #FFFFFF

BADGES & CHIPS

Available

Busy

All

Nearby

Fades

Kids

SPACING SYSTEM

4px base grid. All spacing is a multiple of 4. Horizontal page padding is always 20px.

4px

Minimum gap — between badge and text

8px

Tight gap — between cut-card tags, grid items

10px

Card gap — between stacked search results

12px

Section gap — between title and content

14px

Card padding — inner padding of bordered cards

16px

Section margin — space between distinct sections

20px

Page padding — left/right margin on all screens

24px

Large spacing — above/below stat rows, QR container

BORDER RADIUS

4px

Small elements: tags, inline badges

8px

Barber avatars (square style), specialty tags

10px

Time slot buttons

Iconography & App Icon

Icon style, navigation, and app store presence

ICON STYLE

- Stroke-based icons only. No filled icons. 2px stroke weight at 20x20px.
- Icon source: Lucide Icons (lucide.dev) — consistent with React Native ecosystem.
- Icon color: #0D7377 (teal) for active/primary, #BBBBBB for inactive, #666666 for neutral.
- Icon containers: 42x42px rounded squares with #F0FAFA background for home grid actions.
- Never use emoji as icons. Always use SVG paths.

BOTTOM NAVIGATION

Home	House icon	Active = teal icon + teal text + dot indicator
Search	Magnifying glass	Inactive = #BBBBBB icon + #BBBBBB text
QR	QR code grid	The check-in entry point — most unique to Ehla2ly
Bookings	Calendar	My upcoming and past bookings
Profile	Person	User settings, preferences, style history

APP ICON SPECIFICATIONS

- The app icon uses a teal background (#0D7377) with a white logomark centered.
- Corner radius follows platform defaults: iOS = continuous superellipse, Android = adaptive.
- The logomark (TBD — to be designed later) should be recognizable at 16x16px.
- Export sizes: 1024x1024 (App Store), 512x512 (Play Store), 192x192, 48x48, 32x32.
- No text in the app icon. The logomark must stand alone without the name.
- Dark variant: White/cream background (#F5F0E6) with teal logomark for light OS themes.

Primary (dark)

Light variant

Monochrome

Brand Voice & Usage

Tone, language, and visual do's and don'ts

BRAND VOICE

Confident, not arrogant.

We know barbers. We don't oversell.

Casual, not sloppy.

Egyptian street energy but polished. Think 'ya basha' not 'dear user'.

Functional, not decorative.

Every word earns its place. No filler copy.

Bilingual, not translated.

Arabic and English are equal. Arabic is not a translation of English.

VISUAL RULES — DO'S

- ✓ White-dominant backgrounds. Clean, airy layouts. Let content breathe.
- ✓ Thin borders (1.5px, #E8E8E8) to define cards. No shadows for card elevation.
- ✓ Teal as a surgical accent — buttons, prices, active states, badges. Not backgrounds.
- ✓ Functional icons from Lucide. Stroke-only, 2px weight, consistent sizing.
- ✓ Photography of real haircuts in portfolio sections. No stock photos. No illustrations.
- ✓ Stats and numbers displayed prominently — visit counts, ratings, prices are first-class.

VISUAL RULES — DON'TS

- ✗ No glassmorphism, blur effects, or frosted glass. These are AI-generated aesthetics.
- ✗ No gradients on buttons or cards. Flat solid colors only.
- ✗ No rounded-everything. Use sharp corners (0px radius) on date-strip underlines and dividers.
- ✗ No decorative noise textures, grain overlays, or ambient glow effects.
- ✗ No cream/warm backgrounds inside the app. Cream is for the brand identity, not the UI.
- ✗ No generic placeholder avatars. Use initials on colored backgrounds (teal or gray).
- ✗ No emojis in UI (except the greeting wave on the home screen).

MARKETING VS IN-APP

- Marketing (website, app store, social): Cream (#F5F0E6) backgrounds allowed. Bolder teal usage.
- In-app UI: White (FFFFFF) backgrounds only. Teal used sparingly as accent.
- The dark background (#141310) from the mockup presentation is for design showcases only.
- App Store screenshots should use the cream background with phone mockups centered.

Quick Reference

One-page cheat sheet for developers and designers

COLORS

	#0D7377	Teal — primary CTA, active, prices
	#0A5C5F	Deep Teal — accent card bg, avatar bg
	#FFFFFF	White — app background
	#F5F5F5	Cloud — input bg, time slot bg
	#E8E8E8	Border — card borders, dividers
	#2C2A25	Ink — primary text, headings
	#8A8578	Muted — secondary text, descriptions
	#16A34A	Success — available badge
	#F59E0B	Warning — busy badge
	#EF4444	Danger — no-show, errors

TYPOGRAPHY

English	Plus Jakarta Sans	google.com/fonts — weights 400, 500, 600, 700, 800
Arabic	Noto Kufi Arabic	google.com/fonts — weights 400, 500, 600, 700, 800
Fallback	System sans-serif	Only for development. Never ship with fallback.

KEY MEASUREMENTS

Page padding	20px left/right
Card border	1.5px solid #E8E8E8
Card radius	14px
Button radius	12px
Avatar (circle)	44-54px diameter
Avatar (square)	48px, 14px radius
Icon containers	42x42px, 12px radius, #F0FAFA bg
Time slots	Two-column grid, 12px gap
Bottom nav height	58px
Notch safe area	36px top padding
